

Cthulhu Tentacle Placement

You should have three small gaps in the head from where you made the ch 2s in Row 9 of the Tentacle Head piece.

The stitches for each tentacle are placed around the edge of each ch 2 gap. I've marked on the image to the right where I place each stitch of the first row of the tentacle, but you can fudge this a little. The important thing is to have the right number of stitches more or less spaced evenly around the edge of the gap.

Here's a shot of what the tentacle looks like after the first row of stitches.
