

Jellyfish Mini-Tutorial

Pattern Stitch:

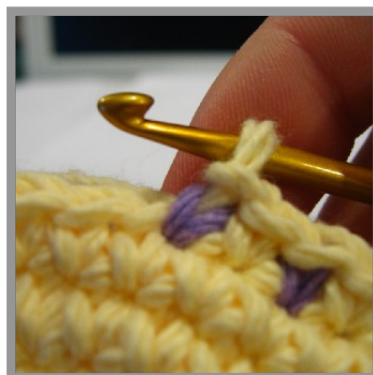

Step 1: sc 1 in main color.

Step 2: pull through the first loop as if to make an sc with the second color.

Step 3: use the main color to make the second loop of the sc

Step 4: the completed stitch shows the secondary color on the bottom and the main color on top.

Jellyfish Mini-Tutorial

Making the stitches for Row 11 of the Top piece:

Here is an example of how a dc stitch in Row 11 would work:

Step 1: use the main color to wrap around the hook

Step 2: still using the main color, pull the first loop of the stitch through

Step 3: still using the main color, pull the second loop through the first loop and the yarn wrapped around the hook

Step 4: use the secondary color to pull a loop through to finish the stitch

Basically, for every stitch in Row 11, use the secondary color for the final loop of each stitch

Jellyfish Mini-Tutorial

Stitch placement for Row 4 of the Base piece:

Each (sc 2 in 1) goes between a pair of tentacles. The placement of the next three (sc 2 in 1) is marked above

Work each the stitches of this row *behind* the tentacles. Three completed sets of (sc 2 in 1) are shown above.

Tips on finishing the jellyfish:

Stitch the base along the underside of the Top. The edge of the Base should fit between Rows 10 and 11 of the Top.

If the lower edge of the Top flares out too much, run a piece of matching yarn through the backs of the stitches, all the way around the row, pull the beginning and end of the yarn tight, tie it in a knot, and weave in ends.
